**EARTHRENEW PART OF SELECT DELEGATION
AT THE ALBERTA ECONOMIC FORUM**

Forum to Showcase the Province before European Investors

CALGARY, April 30 – Christianne Carin, founder, chair and chief executive of EarthRenew Organics Ltd. , will present at the Alberta Economic Forum on the afternoon of May 5th in Geneva, Switzerland, the company announced here today.

Led by Premier Ed Stelmach, Alberta will send a delegation of 40 leading companies and organizations from across the province. The intent of the Forum is to showcase Alberta as one of the leading energy producers of the 21st century and also highlight its diversified and competitive economy (www.albertaeconomicforum.com). EarthRenew is a prime example of the dynamic, high growth, globally-focused companies emerging from Alberta. Ms. Carin will be joined by CFO Mark Kennedy and Vice President Don Dabbs.

The conference anticipates an audience of over 300 attendees at the Grand Hotel Kempinski in Geneva over two days -- May 4-5. Participants will include the senior managers of oil companies, international and local, private and national; bankers from European and Canadian banks; investment funds; governments; senior managers of the infrastructure sector; law firms and consultants.

Ms. Carin, who founded EarthRenew in 1999, is the company's primary inventor and technologies developer, responsible along with her team for more than 2,200 filed patent claims and numerous patents issued globally since 2004. A native of Calgary, Ms. Carin has been instrumental in leading the commercialization of the EarthRenew's technologies and driving its rapid growth.

About EarthRenew

Founded in 1999, the privately-held company is headquartered in Calgary, Canada with US operations based in Half Moon Bay and Fresno, CA. The company developed, patented and implemented new clean technologies, which utilize the direct heat from a natural gas turbine in a cooking process, replacing typically used fuel burners. The initial commercialization of these technologies involves the manufacture of a new class of proprietary fertilizers, that contain concentrated organic matter and nutrients bundled in granules, by cooking raw manure, biosolids and green waste at high temperatures without burning or degrading the content. Additional information may be found at www.earthrenew.com.

About The Alberta Economic Forum

The Alberta Economic Forum will address the challenges and the opportunities of Alberta at turning point in its history. It will provide an opportunity for the government to inform and explain its strategies and policies to the oil & gas companies, bankers, investors and to the infrastructure sector. The conference will provide practical sessions on specific issues that will help the industry and the investors to adjust their strategies and their decisions. The AEF is an investment conference for direct and financial investments but will also address directly and objectively the environmental, economical and technological issues that are conditional to a successful long term investment and involvement in the province. Additional information may be found at www.albertaeconomicforum.com.
